L'ampliamento della gamma con l'introduzione di arredi per esterni è stata la diretta conseguenza della filosofia aziendale, ed ha portato alla creazione di sedute, tavoli e lampade, reinventati per dare ad ambienti esterni la stessa ricercatezza di quelli interni.

Che si tratti di un vaso, di un tavolo geometrico o di un oggetto di design i prodotti Teraplast catturano l'attenzione e sono concepiti per essere sia funzionali che affascinanti, attestando l'eccellente capacità di lavorazione nel campo delle plastiche e dello stampaggio rotazionale.

L'élargissement de la gamme avec l'introduction de mobiliers d'extérieur a été la conséquence directe de la philosophie d'entreprise, et a conduit à la création de sièges, tables et lampes, réinventés, pour donner aux locaux extérieurs la même finesse qu'aux locaux intérieurs.

Qu'il s'agisse d'un vase, d'une table géométrique ou d'un objet design, les produits Teraplast captent l'attention et sont conçus pour être à la fois fonctionnels et fascinants, en témoignant l'excellente capacité d'élaboration dans le domaine du plastique et du rotomoulage.

Der Ausbau der Produktpalette mit der Einführung der Einrichtungsgegenstände für den Außenbereich war die direkte Konsequenz der Unternehmensphilosophie. So entstanden Sitzgelegenheiten, Tische und Lampen, die neu ausgedacht wurden, um den Außenbereichen die gleiche Finesse wie den Innenbereichen zu verleiten.

## Riserva d'acqua

La riserva d'acqua permette di alimentare le vostre piante senza bisogno di irrigarle spesso.

I fori di drenaggio per il "troppo pieno" permettono di scaricare eventuali eccessi di acqua così sarà la pianta stessa ad attingere alla riserva d'acqua quando ne avrà bisogno.

Alcuni dei vasi dotati di questo sistema presentano anche una membrana di rivestimento che, una volta rimossa, permette all'acqua in eccesso di fuoriuscire dal vaso.

## Water reserve

The water reservoir allows to feed your plants without having to water it often.

The drainage holes for the "overflow" allow you to download any excess water so the plant itself will be to draw on the reserve of water when it needs them.

Some of the pots equipped with this system also have a coating membrane that, once removed, it allows excess water to leak from the pots.

## Réserve d'eau

Le réservoir d'eau permet de nourrir vos plantes sans avoir à les arroser souvent. Les trous de drainage pour le «débordement» vous permettent de télécharger tout excès d'eau de sorte que sera elle-même à puiser dans la réserve d'eau quand il en aura besoin.

Certains des pots équipés de ce système ont également une membrane d'enrobage qui, une fois enlevé, permet à l'eau en excès de sortir

## Wasser-Reservoir

Das Wasser-Reservoir ermöglicht, Ihre Pflanzen zu versorgen, ohne ständig Wasser zuzuführen.

Die Entwässerungslöcher lassen das Wasser überlaufen, damit die Pflanze das nach Bedarf schöpfen kann.

Einige Pflanzgefäße mit Wasserspeicher besitzen eine Abdeckung-Membrane, die das Wasser, bei Wegnahme, überlaufen lässt.

## Essential Self Watering

### Riserva d'acqua

La riserva d'acqua permette di alimentare le vostre piante senza bisogno di irrigarle spesso. I fori di drenaggio per il "troppo pieno" permettono di scaricare eventuali eccessi di acqua così sarà la pianta stessa ad attingere alla riserva d'acqua quando ne avrà bisogno.

### Water reserve

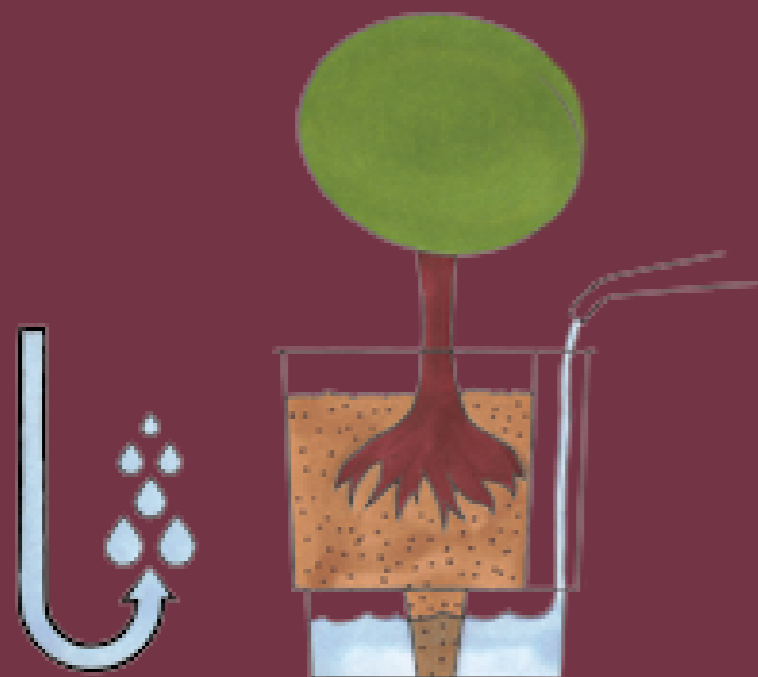

The water reservoir allows to feed your plants without having to water it often. The drainage holes for the "overflow" allow you to download any excess water so the plant itself will be to draw on the reserve of water when it needs them. Some of the pots equipped with this system also have a coating membrane that, once removed, it allows excess water to leak from the pots.

### Avec reserve de l'eau

Le réservoir d'eau permet de nourrir vos plantes sans avoir à les arroser souvent. Les trous de drainage pour le «débordement» vous permettent de télécharger tout excès d'eau de sorte que sera elle-même à puiser dans la réserve d'eau quand il en aura besoin. Certains des pots équipés de ce système ont également une membrane d'enrobage qui, une fois enlevé, permet à l'eau en excès de sortir.

### Wasser reservoir

Das Wasser-Reservoir ermöglicht, Ihre Pflanzen zu versorgen, ohne ständig Wasser zuzuführen. Die Entwässerungslöcher lassen das Wasser überlaufen, damit die Pflanze das nach Bedarf schöpfen kann. Einige Pflanzgefäße mit Wasserspeicher besitzen eine Abdeckung-Membrane, die das Wasser, bei Wegnahme, überlaufen lässt.

Per installazione all'esterno. Certificati CE, classe di isolamento IP55, completi di cavo di alimentazione, presa bipolare, lampada. Non sono dotati di interruttore. Si consiglia che l'installazione all'esterno venga effettuata da personale qualificato. Le versioni outdoor sono dotate di un foro e un tubo per il drenaggio dell'acqua che si potrà accumulare nel contenitore. È fondamentale che il foro e il tubo non vengano ostruiti in modo tale da permettere un sicuro drenaggio. Per questo consigliamo di non mettere mai la pianta o la terra direttamente nel contenitore ma di posizionare sempre un sottovaso e un vaso di contenimento di dimensioni appropriate. Pulire frequentemente il foro e il tubo di drenaggio.

For outdoor installation. Certificates CE, IP55 dielectric strength class, complete with power cord, hole plug, lamp. Not equipped with a switch. It is recommended that the installation is made by qualified personnel. The outdoor version is equipped with a hole and a tube to drain water that might be accumulated in the container. It is important that the hole and the tube will not be obstructed so as to allow safe drainage. Therefore we recommend to never put the plant or the soil directly in the container but always place a saucer and a pot of appropriate sizes. Never put the soil or plant directly into the container. In this way you risk to obstruct the hole and the drainage tube compromising their operation and safety. Please clean frequently the hole and the drainage tube.

Ne jamais mettre la terre ou la plante directement dans le recipient. De cette manière il peut s'obstruer l'orifice et le tuyau de drainage en compromettant le fonctionnement et la sûreté. Mettre toujours un sous-vase ou un vase de la dimension appropriées à la plante. Nettoyer souvent le trou et le tube de drainage.

Niemals Erde oder Pflanzen direkt in den Behälter setzen. Sie riskieren, dass Öffnung und Rohr der Drainage verstopfen und somit die Funktion und Sicherheit nicht gewährleistet ist. Benutzen Sie stets Pflanztopfuntersetzer oder Töpfe mit angepasster Größe für Behälter und Pflanze. Reinigen Sie regelmäßig Öffnung und Rohr der Drainage.
